Manager

Simple to Use**Minimal Typing Skills Required****Point & Click Interface****Flexible Reporting****Integrated Email****Links to MS Office****Written in NZ**

Carpet & Curtain Manager looks after the “nuts and bolts” of your business so you don’t have to!

With the basics taken care of — you will have more time to concentrate on developing your business to it’s full potential.

General Ledger & Cashbook**Accounts Payable****Accounts Receivable****Contact Management****Inventory Purchasing****Job Costing****Job Scheduling****Point of Sale****What is CCM?**

Carpet & Curtain Manager is a multi-user, multi-company and multi-stock location integrated software accounting suite, designed for the flooring and soft furnishing industry. Written in New Zealand for New Zealanders, it has a simple intuitive user interface whilst being built on a robust and secure database.

General Ledger & Cashbook

Fully integrated, so your aged trial balance, balance sheet and profit & loss are live up to the last transaction entered. Cashbook supports multiple cash accounts over multiple companies with a simple reconciliation procedure and reporting.

Accounts Payable

Integrates with your banking. Easy caters for instances when supplier’s invoice arrives at a different cost to the purchase order. Easy handling of supplier credits and returns (RMAs).

Accounts Receivable

Adjust or transfer customer balances with ease. Quickly clear or write off small balances. Take payments and apply to multiple invoices whether complete or WIP. Simple to

reconcile daily banking by payment methods. Easy handling of prompt payment discounts and late payment charges for different customer account types.

Contact Management

Track samples, customer complaints and leads. Simple quoting and price manipulation from templates integrated directly with Microsoft Word for fast professional output. Control minimum margins / markups on job. Track and pay commission Base pricing off supplier’s price books or current specials. Report rich including top products, top colours, quote conversions, margins / markups, MTD & YTD and last year sales comparisons with graphs. Allow multiple quote options and room areas. Handles tenders and progress payments.

Inventory Purchasing

Full stock control including purchasing, adjusting and re-valuation. Flexible receipting to cater for part orders, split or different roll lengths. Ordering caters for different units of measure and their associated pricing structures. Record dye batches, docket numbers and bin locations. Transfer stock between warehouses. Produces stock labels with barcodes for integration with PDA. Simple stock take procedures inte-

grating with Excel.

Job Scheduling

Control and schedule layers with ease whether contractor or on wages. Move jobs between layers and the job costs automatically update. Pencil in holidays and downtime. Full indexed searching on job number, location, document number or product. Prevent confirmation of bookings where product is yet to arrive. Email schedules to customers, builders and contractors.

Point of Sale

Sell product by scanning barcode or use the supplier’s UPC code. Automatic rounding of invoices, Restrict amount teller can authorise. Reconcile takings with daily banking. Software compatible with most POS scanners, cash drawers and receipt printers.

Administration & Security

Control user access with security groups and levels. Administer database files used system wide. Restrict access to special functions like bulk price updates and product setup.
