setup

## e - Board

### What is e-Board?

e-Board is a simple to use Electronic Bulletin Board. It allows you to quickly look up where a staff member is and whether they are available — all without leaving your desk!

### What does it look like?

e-Board is a software program that sits on the side, top or bottom of your computer screen. When you change your status, it shows all other users, in real-time, that your status or availability has changed.

### How does it work?

There are two traffic lights. The “Availability Light” shows whether a person is available or not (Green=Available, Red=Not Available). The “Status Light” shows a colour coded status of a person (e.g. At Lunch, On the Phone, Gone Home etc.).

When you hover over a person’s initials with your mouse, e-Board shows the person’s full name, a description of their status and any message left by that person.

Figure 1—e-Board positioned on LHS of screen

### What can be Customised?

Virtually anything. For example you decide:-

- which staff members form part of which e-Board group
- the list order and display of staff on your e-Board

Figure 2—Picking & Ordering Staff Members

- e-Board status names and colours

Figure 3—Entering & Assigning e-Board Statuses

- positioning of e-Board on your screen
- who has administrative rights to add & maintain the database

### I want it— How much is it?

An e-Board five user license costs \$250.00 including installation & setup. Additional users can be added at \$45.00 per user. If you are a larger organization, we are happy to give you a quotation!

### Want more Info?

Contact us by phone, fax or email.

If you want to see before you buy, pop in and see our friendly staff—we are happy to give you an obligation free demonstration.
